

WildFire 18%

4 ounce Pepper Spray

Derivative of 3 Million Scoville Heat Units of Oleo Resin Capsicum with an Identifying Ultra Violet Dye

DIRECTIONS: To fire, hold can in upright position. Turn actuator to remove safety. Point can at attackers face and firmly depress actuator button. After spraying attacker, immediately run for help. If there is wind, you may wish to shield your eyes with your other hand. You will get approximately 18-20 one second bursts. The effective range is 15-18 feet. Use for defensive purposes only!

REACTION: WildFire™ is an inflammatory agent. It will induce coughing, choking and nausea, as well as dilating the eye capillaries resulting in temporary blindness. The mucous membranes will swell to prevent all but life support breathing causing the assailant to be temporarily incapacitated. A one second burst of WildFire™ will stop an attacker for up to 45 minutes without causing permanent damage.

FIRST AID: Avoid contact with skin. If contact is made, wash affected area thoroughly with water. DO NOT use any creams, salves or soap. Expose area to fresh air. Effects will generally disappear after 45 minutes. If symptoms persist, see a physician immediately.

CAUTION: CONTENTS UNDER PRESSURE! Do not puncture or incinerate can! Do not store above 120 F. **WARNING:** The use of this device for any purpose other than self-defense is a crime under the law. Contents are dangerous--use with care. Misuse is punishable by jail, fines or both.

KEEP OUT OF REACH OF CHILDREN!
