

Glass Break Alarm

HOW IT WORKS

This product has used micro technology to create the compact Glass Break Alarm. It is mounted on window glass and will detect sharp window "thump" or breakage. The Alarm instantly turns ON ... and will automatically shut OFF approximately 30 seconds.

EASY TO INSTALL

1. Open the battery cover to install a 12V battery (make sure the polarity is correct to the battery marking).
2. Stick Glass Break Alarm to window glass with tape attached.
3. Set switch to ON position, now unit is standby to work.

NOTE:

- Whenever you set the switch to OFF position, wait 5 seconds (for unit to reset) before setting the switch to ON again
- To replace battery when alarm sounds weak, (Battery type ALKALINE 12V GPI: GP23A or Equivalent).

WHERE CAN IT BE USED

The Glass Break Alarm is intended for windows or other glass entry areas that may be in remote parts of the house... such as bedroom windows. The Glass Break Alarm will notify you by sounding an alarm if an intruder is attempting to gain access through a window.
